50X1-HUM

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. There are 18 shafts in the Jáchymov (N51/160) area in which uranium ore is mined. The ore is packed in metal boxes, 30x30x30 cm., and is shipped to Russia by rail. Most of the ore is transported from the mine area to the Jáchymov RR station in 8-ton Tatra and Teda trucks. There are about 3,000 trucks in use in the mine area. A part of the ore is trucked to the Ostrov station (N51/170) for shipment to Russia. The trucks are covered with tarpaulins and are guarded by SMb personnel. On the way to the Ostrov station the trucks pass through a border security area. While passing through the area the trucks are under orders not to stop for any reason and are not halted for controls of any sort.
2. There are allegedly about 70,000 workers in the Jáchymov area of whom about 30,000 are forced laborers. About 80% are presumably Germans (sic). The so-called "free workers" are mostly East Germans; their number is judged to be about 20,000. The remaining 20,000 workers are from Czechoslovakia, mostly Slovaks, and Hungary.
3. Reportedly about 20,000 border security police (SMb)¹ are stationed in the area. An additional 250-300 mine guards are on duty in the mine area. Their commanding officer is (fnu) Havel who is also the deputy chief of the local People's Militia (Lidova milice), which numbers about 600 men. The commanding officer of the Militia is (fnu) Korima. State Security police (StB) under (fnu) Kalinsky are also stationed in the area. Their strength is unknown. Another StB official is (fnu) Zacik. Mine director and MVD area chief is the Russian engineer (fnu) Lrasnov. (Fnu) Siminsky, a Czech, is the general director of the mine, but is subordinated to Lrasnov.
4. A plant is under construction in Hejdel (N51/150) which is to be a uranium ore sorting station. The name of the plant is Vysoka pec (blast furnace).
